

FL^eX Pro8

The Pro8 top convinces with its homogenous and high-resolution music signal reproduction. Because of the use of a coax speaker it generates a real point source.

The top is equipped with a passive crossover between high and mid driver. You can use this top either with the Sub12 or with the optional Backpack to operate it in perfect condition including a group delay and a frequency correction with FIR filters.

That's how you will get a usable coverage of 80° x 80° with a perfect time alignment.

The Pro8 top has a pole mouth for stacking it on speaker stands, but you can also use the M8 threads to fly it in different ways.

For an easy handling there is a handle at the backside of the housing. The cone of the 8" driver is special coated against humidity and the stable housing with the strong grill allows to use this top in a daily tour condition without problems

Features

- 8" Coax Speaker as real point source.
- 80° x 80 ° coverage.
- Compact housing design.
- Longlasting and durable coating for tour and rental usage.
- Extremely high resolution.

Technical Data

Type:	Coax Top / Monitor passive
Equipping:	MF: 8"/50mm voice coil HF: 1" Tri Acetate Diaph./25mm voice Coil
Max Power AES:	350W
Frequency Res -6dB	120Hz - 18kHz / 80Hz - 20kHz in combination with Sub12 or backpack only
SPL 1W/1m:	98dB
SPL max:	128dB
Coverage:	80° x 80°
Impedance:	8 Ohm
Connection:	2 x Speakon NL4MP 4-pole wiring
Dimension (w x h x d):	240 x 360 x 220 mm
Cabinet:	15mm birch plywood with wooden handle Warnex coating black 4 rubber feet + Pole mouth 35mm
Options:	RAL colours upon request Active module "Backpack"
